

Guarded reuse

While the image and action gates pass, the call is skipped and the previous action repeated, up to a cap.

Temporal fusion

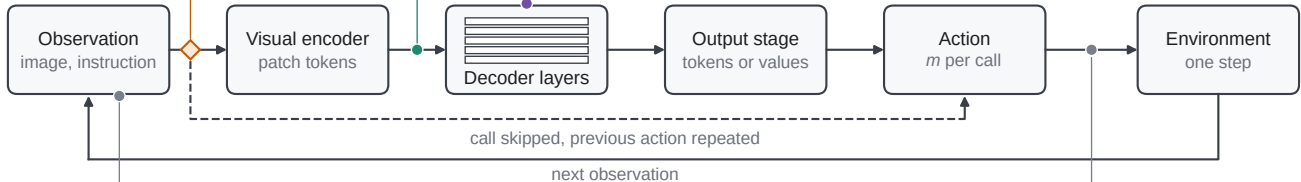

A capped number of unprotected patches keep their token from the previous call.

Depth pruning

The layers lowest in Block Influence are removed, the ends kept.

Foveation

Blurred outside a central disc, the token count unchanged.

Action repeat

Each action is held for k steps with one call.

Dots and the diamond mark where each intervention takes effect, and the dashed path marks the skipped call.
